EU Battery Directive (2006/66/EC)

We, Net Optics, Inc., hereby declare that our products are in compliance with EU Directive 2006/66/EC.

Article 11 of Directive 2006/66 requires that “manufacturers design appliances in such a way that waste batteries and accumulators can be readily removed.” However, this requirement does not apply where “for safety, performance, medical or data integrity reasons, continuity of power supply is necessary and requires a permanent connection between the appliance and the battery or accumulator.”

Batteries incorporated into Net Optics products are exempted from the readily removed requirement of the Directive for data integrity reasons, and are not marked with the separate collection and chemical symbols because end users are not expected to dispose of the battery separately from the product. Such batteries shall be separated from the product during the treatment phase of the product as required under the WEEE Directive. In particular, this exemption applies to the button or “coin” cell lithium batteries that are supplied embedded in some of Net Optics’ equipment.

The table below includes Net Optics’ specific battery usage by product:

Product Family	Battery Part # and Weight	Battery Description	Quantity per Unit
DIR-3400	CR2032 2.6 Grams	Lithium Coin, 3V, 20mm	1
DIR-7400	CR2032 2.6 Grams	Lithium Coin, 3V, 20mm	1
