

# Director Pro - Network Controller Switch Implementation

Director Pro provides or enables permanent, in-line or Span access to monitor all full-duplex or mirror port traffic without data stream interference at 1Gbps and 10Gbps. ①

Director Pro filters user specified traffic on all connections to the appropriate monitoring devices by using Dynamic Load Balancing, Deep Packet Inspection and Management tools

For increased monitoring leverage, Director Pro units can be easily daisy-chained, or stacked using flexible XFP modules.
